PHN PACKAGING

The activity

- Plastic Packaging Innovation (cap, neck finish, bottle) for major customers, bottlers, processors in Europe and worldwide.
- Listening to customers requests to meet their expectations.
- Technical advice.
- Innovations.
- Patents.
- Developments.
- 3D Studies, computer graphics, models.
- Studies and realization of pilot and production molds.
- Study and realization of special machines.
- Customer assistance on bottling line.
- Laboratory analysis.
- Product approval with the client.
- Quality.
- Production.
- Delivery.
- Partner during the life of the product.

The strong points

- 
- Blow Molding (HDPE, PP, PVC, PETG, Multilayer process, shampoo bottles, detergent bottles, soap packaging, ball for washing machine).
Injection Blowing (PET pot for cosmetics).
Injection blowing with biaxial molding (PET, shampoo bottle, bottle washing windows).
Injection (HDPE, PP, caps all categories).
Decoration with heat printing and gilding process on flexible and rigid bottles.
Multiple assembly.
 - My professional career rich in experience with ground missions ranging from the product to the tooling conception, the production stage, the technical meetings and line tests at customers, the product approval, enables me to offer innovative concepts that can be industrialized at a competitive price.
 - My client and supplier relationship always appreciated by the fact that I fulfill my commitments eases the confidence of my customer on the success of projects, my partners being professionals with whom I have strong and reliable contacts.
 - Recently completed by my 13 years mission spent at the head of a Research and Development Department in a large international group specialized in the design and production of plastic caps, my knowledge allows me to prepare and lead projects with success.
 - Many patents have been registered in the fields of innovation and industrialization technologies.

PHN PACKAGING

The ressources

To meet the business and the customers requirements and be competitive in the new industrial world, it is important to be reactive, to act without restraint, and to fulfill ones commitments.

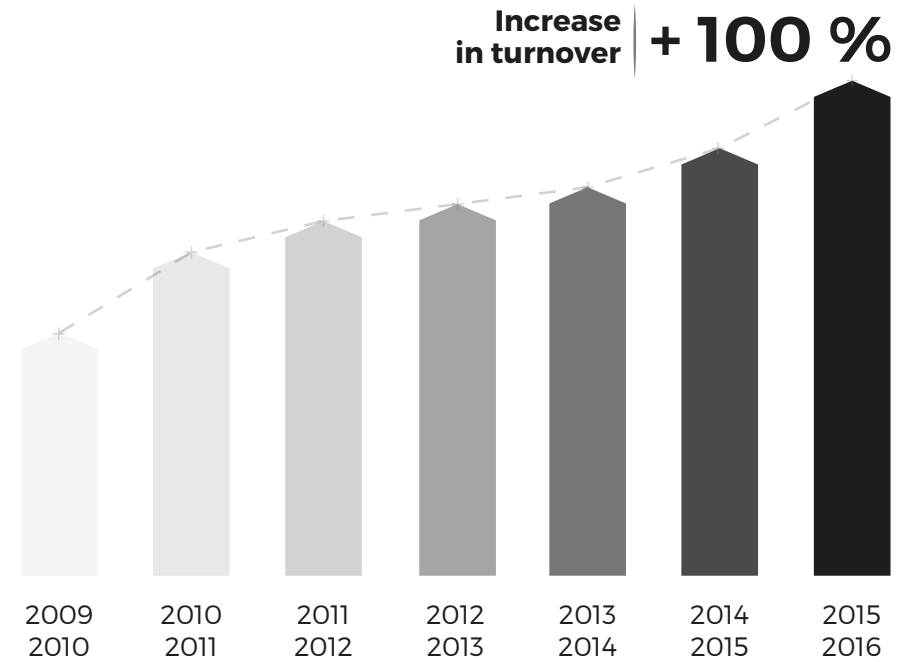

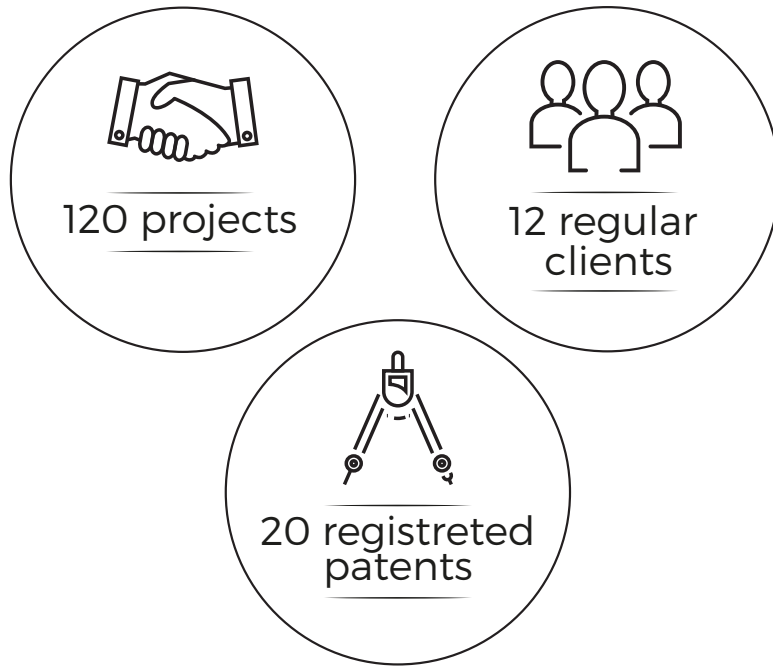

Each step of the process will be developed with professional partners (Study Office, designers, mold makers, plastics processors, laboratories, carriers).

The Manager Philippe NUSBAUM will be the project leader for each case and will ensure the product conception as well as the definition of each step of the business.
